

L1-L6 is Chat-surface vocabulary and is not defined in this repository (fc-011).  
Every MEASURED box names the ledger entry that measured it.

the loop

## L6 next fixation

argmax over the belief

MEASURED fc-007, bio-011

## L5 allocation

where the measurement  
budget is spent

MEASURED fc-008, bio-017

## L4 scale to depth

expand about the fixated  
disparity; eta-squared term

MEASURED bio-004, bio-005

## L3 match

disparity, variance, validity

MEASURED bio-001, gap-010

## L2 encode

rectified stereo pair

BUILT

## L1 oculomotor

fixation to two eye rotations,  
Listing's law

MEASURED fc-012, bio-082

*outside the stack*

## sampling model

index to unit ray;  
projection swappable

MEASURED fc-009, bio-077

## head-frame belief

stores directions,  
not pixels

MEASURED fc-013, bio-081

## rig / sensor split

baseline apart  
from focal length

BUILT

*named, not built*

## controlled contrast at occlusions

HYPOTHETICAL od-002

## variable-resolution sampling

HYPOTHETICAL od-004

## mechanical plant

HYPOTHETICAL od-003
